	Opacity	> 96 %	DIN 2471
	Colour (D50 2°)	L* 95,0 a* 1,0 b* -3,0	DIN 6174

**Conditions of Use and Stocking**

The ink amounts must be adjusted to the paper. Please reduce the single colors cyan, magenta, yellow and black (ink restrictions) and shorten the maximum amount of ink (ink limit). This will help your costs on inks and improve your drying performance.

Pasting application: After wetting the paper should be kept in a plastic box in order to wet the paper sufficiently.

Keep euromedia solvent photo satin wet for at least eight hours. Longer periods of time don't have any negative impact on the paper.

In the event that the paper is exposed to severe climatic conditions, or if it needs to be used for a longer period of time, lamination is recommended. It is advisable to protect the edges and corners if the billboard hoarding is regularly cleaned.

To maintain the high quality of the paper, it should be stored and converted in a climate of 30 – 65 % relative humidity and at a temperature of 10 – 30 °C
